

A FAMILY TOOLKIT: PEDIATRIC-TO-ADULT HEALTH CARE TRANSITION

Developed by Got Transition[®] and its
National Health Care Transition
Family Advisory Group

ABOUT GOT TRANSITION®

Got Transition® is a program of The National Alliance to Advance Adolescent Health and is funded through a cooperative agreement from the federal Maternal and Child Health Bureau, Health Resources and Services Administration. Its aim is to improve transition from pediatric to adult health care through the use of innovative strategies for health care professionals and youth, families, and caregivers. For more health care transition resources and information about Got Transition, please visit GotTransition.org. For more information about The National Alliance to Advance Adolescent Health, please visit TheNationalAlliance.org.

ACKNOWLEDGEMENTS

A Family Toolkit: Pediatric-to-Adult Health Care Transition was developed by Got Transition and its National Family Health Care Transition Advisory Group, whose members include the following:

- Allysa Ware, Family Voices, Advisory Group Co-Chair
- Annie Schmidt, Got Transition, Advisory Group Co-Chair
- Peggy McManus, Got Transition
- Patience White, Got Transition
- Becky Harmon, National Family Association for Deaf-Blind
- Amy Kratchman, Institute for Patient and Family-Centered Care
- Jana Monaco, Genetic Alliance
- Yetta Myrick, Family Voices
- Corrie Petersen, ASK Family Services
- Tamara Pursley, National Down Syndrome Congress
- VaCora Rainey, Jack and Jill of America
- Derek Robertson, Sickle Cell Disease Association of America
- Erin Seigh, SPAN Parent Advocacy Network
- Lisa Thompson, Autism Society of America

INTRODUCTION

Three major professional organizations – American Academy of Pediatrics, American Academy of Family Physicians, and American College of Physicians – recommend that all youth receive pediatric-to-adult health care transition (HCT) services. Yet, national data consistently show that the majority of youth with and without special health care needs are not receiving needed HCT support from their health care providers.^{1,2} According to the 2017/2018 National Survey of Children’s Health, 81% of youth with special health care needs and 86% of youth without special health care needs do not receive transition preparation services.² Youth and families report many barriers to transition, which include feeling unprepared to move to a new doctor and manage their own care, anxiety about leaving their current doctor, difficulty finding a new adult doctor, and understanding the adult health care system.¹

This toolkit was developed for families to use during pediatric-to-adult HCT and includes resources for both parents/caregivers and youth/young adults. The next page provides a summary of the tools that are included. These tools can be used to better prepare youth and families for the transition to adult care. This toolkit can be downloaded for free on Got Transition’s website at GotTransition.org.

SUMMARY OF HEALTH CARE TRANSITION TOOLS

This toolkit has a set of resources for you to use as you work with your youth during the transition from pediatric to adult health care.

This toolkit includes two **Health Care Transition (HCT) Timelines** (pages 3-4), one for you and one for your youth. Each one has steps to take, starting at age 12, to prepare your youth to take charge of their own health and health care.

The **Parent Guide** (page 5) is a summary of clinical recommendations from three major professional organizations – American Academy of Pediatrics, American Academy of Family Physicians, and American College of Physicians – on HCT for youth with and without special health care needs.

The **Questions to Ask Your Doctor** (pages 6-7) are questions for you and your youth to ask while getting ready to move to a new doctor and before making the first visit.

Changing Roles (page 8) shows how the roles of you and your youth change as your youth takes more control of their own health and health care. If you think you need legal decision-making support, the **Charting the Life Course** (page 9) tool – created by the University Center for Excellence in Developmental Disabilities at the University of Missouri-Kansas City Institute for Human Development – can be a useful tool for beginning the conversation with your youth about decision-making support needs in six areas: daily life and employment, healthy living, social and spirituality, safety and security, community living, and citizenship and advocacy.

The **Turning 18** tip sheet (page 11) shares some changes that happen when your youth turns 18 and is a legal adult. Two more tools show the differences between pediatric and adult care. The **Planning to Move from Pediatric to Adult Care** tool (page 12) is for youth. It shows how their care will change once they move to an adult approach to care, shares some thoughts from youth and young adults, and has tips to get ready for the change. **System Differences** (page 14) also has information about the major differences between pediatric and adult care.

To learn about your youth's knowledge about taking care of their own health, have them take the **Transition Readiness Assessment** on page 15. You can also take the readiness assessment on page 17 and compare your answers. Readiness assessments for youth with intellectual/developmental disabilities and their parents/caregivers start on page 19. Your youth can also take an online **Health Care Transition Quiz** (page 23) that was created by Got Transition's National Youth and Young Adult Advisory Group as another test of how ready they are to transition to adult care.

For more resources, visit GotTransition.org or contact info@gottransition.org.

Health Care Transition Timeline

for Youth and Young Adults

Age 12-13

- Learn about your health condition, medications, and allergies.
- Ask your doctor questions about your health.
- Ask your doctor if and at what age they no longer care for young adults

Age 14-15

- Find out what you know about your health, health care, and family medical history. Both you and your parent/caregiver can take Got Transition's Transition Readiness Assessments* and discuss this together and with the doctor.
- Carry your own health insurance card.
- Learn more about your health and what to do in case of an emergency.
- Practice making a doctor's appointment and ordering prescription refills (either by phone, online, or through an app).
- Begin to see the doctor alone for part of the doctor's visit to help gain independence in managing your health and health care.

Age 16-17

- Make doctor's appointments, see the doctor alone, ask the doctor any questions you have, and refill medications.
- Ask the doctor to talk with you about your privacy rights when you turn 18.
- Work with your doctor to make a medical summary. Keep a copy for yourself.
- Before you turn 18 and become a legal adult, figure out if you will need help making health care decisions. If so, ask your Family Voices chapter for local resources.
- Talk with your parent/caregiver about the age you want to transfer to a new doctor for adult care.

Age 18-21

- You are a legal adult at age 18 and are legally responsible for your care. Parents/caregivers cannot access your medical information or be in the doctor's visit unless you agree.
- Work with your current doctor to find a new adult doctor, if needed. Make sure that the new doctor accepts your health insurance.
- Update your medical summary with your doctor. Have your doctor send this to your new adult doctor. Keep a copy for yourself.
- Call your new adult doctor to schedule the first appointment. Make sure the new office has your medical information, and learn if there are any charges at the visit.
- Learn if there are additional changes at 18 that affect you (e.g., health insurance, Social Security Income).

Age 22-25

- Continue to get care from your adult doctor, learn to manage your health and health care, and update your medical summary.
- Be sure to stay insured. If you change your health insurance, make sure your doctor takes your insurance, and learn if there are any charges at the visit.

*For a Transition Readiness Assessment for youth, visit <https://gottransition.org/6ce/leaving-readiness-assessment-youth> and for a version for parents/caregivers, visit <https://gottransition.org/6ce/leaving-readiness-assessment-parent>.

Health Care Transition Timeline

for Parents/Caregivers

Age 12-13

- Help your teen learn about their own health condition, medications, and allergies.
- Encourage your teen to ask their doctor questions about their own health.
- Ask your teen's doctor if and at what age they no longer care for young adults.

Age 14-15

- Learn what your teen knows about their own health, health care, and family medical history. Both you and your teen can take Got Transition's Transition Readiness Assessments* and discuss this together and with the doctor.
- Have your teen carry their own health insurance card.
- Help your teen learn more about their own health and what to do in case of an emergency.
- Help your teen practice making a doctor's appointment and ordering prescription refills (either by phone, online, or through an app).
- Encourage your teen to see the doctor alone for part of the doctor's visit to help gain independence in managing their own health and health care.

Age 16-17

- Encourage your teen to make doctor's appointments, see the doctor alone, ask the doctor questions they may have, and refill medications.
- Ask the doctor to talk with your teen about their privacy rights when they turn 18.
- Work with your teen and the doctor to make and share a medical summary.
- Before your teen turns 18 and becomes a legal adult, figure out if they will need help making health care decisions. If so, ask your Family Voices chapter for local resources.
- Talk with your teen about the age they want to transfer to a new doctor for adult care.

Age 18-21

- At age 18, your child is a legal adult and legally responsible for their care. You cannot access their medical information or be in the doctor's visit unless your young adult agrees or certain legal forms have been completed.
- If you need local resources on supported decision-making, ask your Family Voices chapter.
- Learn if there are additional changes at 18 that affect your young adult (e.g., health insurance, Social Security Income).
- Encourage your young adult to ask their current doctor to find a new adult doctor. Make sure that the new doctor accepts your young adult's health insurance, and help them learn if there are any charges at the visit.
- Encourage your young adult to keep a copy of their medical summary and always carry their health insurance information with them.

Age 22-25

- Encourage your young adult to get care from their adult doctor, learn to manage their own health and health care, and update their medical summary.
- Encourage your young adult to stay insured. If they change health insurance, encourage them to make sure their doctor takes their insurance and learn if there are any charges at the visit.

*For a Transition Readiness Assessment for youth, visit <https://gottransition.org/6ce/leaving-readiness-assessment-youth> and for a version for parents/caregivers, visit <https://gottransition.org/6ce/leaving-readiness-assessment-parent>.

PREPARING FOR THE TRANSITION FROM PEDIATRIC TO ADULT HEALTH CARE: PARENT GUIDE

Parents are familiar with the many transitions their children experience as they grow – their first steps, first words, first day of school, and last day of high school. But what about the last visit to the pediatrician or the first visit to an adult doctor? What about the planning that might make that transition less stressful and more successful? Many parents and youth do not consider this transition until it is suddenly upon them. And this may be even more true for youth and young adults with special health care needs who use the health care system more often.

The American Academy of Pediatrics (AAP), along with the American Academy of Family Physicians (AAFP) and the American College of Physicians (ACP) recently updated their recommendations for this important transition. In 2018 they published “[Supporting the Transition of Health Care from Adolescence to Adulthood in the Medical Home](#).” This clinical report offers guidance for pediatric and adult providers to help youth and parents gain skills to manage their own health as youth move to adult care.

The AAP advises that parents and their doctors begin to plan for transition as early as age 12. They also advise parents to plan for the move to an adult doctor between ages 14 and 18. Doctors and parents can assist their youth and young adults to manage their own health and health care. These skills include making an appointment and filling a prescription. It also includes knowing their personal and family health histories and asking questions during an office visit. During these years, transition planning could include asking the youth questions about their skills to manage their own health and making and sharing a medical summary and emergency care plan. The planning should include discussing changes in privacy and consent that happen at age 18 and preparing a plan of care with youth on their transition goals. The goal is to have this transition happen sometime between age 18 and the early 20s.

Health care transition may be different for youth and young adults with special needs. That includes those with serious chronic medical or behavioral needs and those with developmental or intellectual disabilities. These young adults may require more in-depth planning and on-going support because a variety of specialists can be involved. If the young adult will require help with health care decisions, legal plans for this must be in place by age 18.

Parents have a key role to play in helping their youth to learn to manage their health on their own. Below are a few questions that parents can ask their child’s doctors:

1. When does my child start to meet with you alone for part of the visit to become more independent in their health care?
2. What does my child need to learn to get ready for adult health care? Do you have a checklist of self-care skills that my child needs to learn?
3. Can I work with you to prepare a medical summary and emergency care plan for my child?
4. Before my child turns 18, what information about privacy and consent do we need to learn about? If my child needs help making health decisions, where can I get information about this?
5. At what age does my child need to change to a new doctor for adults?
6. Do you know any adult doctors for my child to transfer to?

More information about transition to adult health care for youth, parents and guardians, and health care clinicians can be found at GotTransition.org.

The AAP, AAFP, and ACP would like all youth to be as ready and able as possible to manage their own health care needs and to navigate health care services throughout their lives. To build self-care skills, a structured process of planning achieved through a partnership between doctors, youth, and parents is key.

FOR YOUTH AND YOUNG ADULTS: QUESTIONS TO ASK YOUR DOCTOR ABOUT TRANSITIONING TO ADULT HEALTH CARE*

DURING YOUR ADOLESCENT YEARS:

- When do I start to meet with you on my own for part of the visit to become more independent when it comes to my own health and health care?
- What do I need to learn to get ready for adult health care? Do you have a checklist of self-care skills that I need to learn?
- Can I work with you to prepare a medical summary for me and, if needed, a plan for what to do case of an emergency?
- When I turn 18, what information about privacy and consent do I need to know about? If I need help with making health decisions, where can I get information about this?
- At what age do I need to change to a new doctor for adult health care?
- Do you have any suggestions of adult doctors to transfer to?

BEFORE MAKING THE FIRST APPOINTMENT TO A NEW ADULT DOCTOR:

- Do you take my health insurance? Do you require any payment at the time of the visit?
- Where is your office located? Is there parking or is it near a metro/bus stop?
- What are your office hours, and do you have walk-in times?
- What is your policy about making and cancelling appointments?
- How will I be able to communicate directly with the doctor after my visit or in the evenings?
- If needed, can the new adult doctor help me find adult specialty doctors?

BEFORE THE FIRST VISIT TO THE NEW ADULT DOCTOR:

- Did you receive my medical summary from my pediatric doctor? (Call your pediatric doctor to remind them to send the medical summary before your first visit to the new adult doctor.)
- What should I bring to the first visit?
- Who can help me when you are not available?

NOTES: _____

*The American Academy of Pediatrics, American Academy of Family Physicians, and American College of Physicians recommend that all youth and young adults work with their doctor or other health care provider to build independence and prepare for the transition to adult care. For more information about transition, please visit gottransition.org/youth-and-young-adults and gottransition.org/parents-caregivers.

FOR PARENTS/CAREGIVERS: QUESTIONS TO ASK YOUR CHILD'S DOCTOR ABOUT TRANSITIONING TO ADULT HEALTH CARE*

DURING YOUR CHILD'S ADOLESCENT YEARS:

- How do I best prepare my child to meet with you alone for part of their visit to become more independent when it comes to their own health and health care? When will they start to have time alone with you?
- What does my child need to learn to get ready for adult health care? Do you have a checklist of self-care skills that my child needs to learn?
- Can I work with you to prepare a medical summary for my child and, if needed, a plan for what to do in case of an emergency?
- Before my child turns 18 and becomes a legal adult, what information about privacy and consent do we need to learn about? If my child needs help with making health decisions, where can I get information about this?
- At what age does my child need to change to a new doctor for adult health care?

BEFORE TRANSFERRING TO A NEW ADULT DOCTOR:

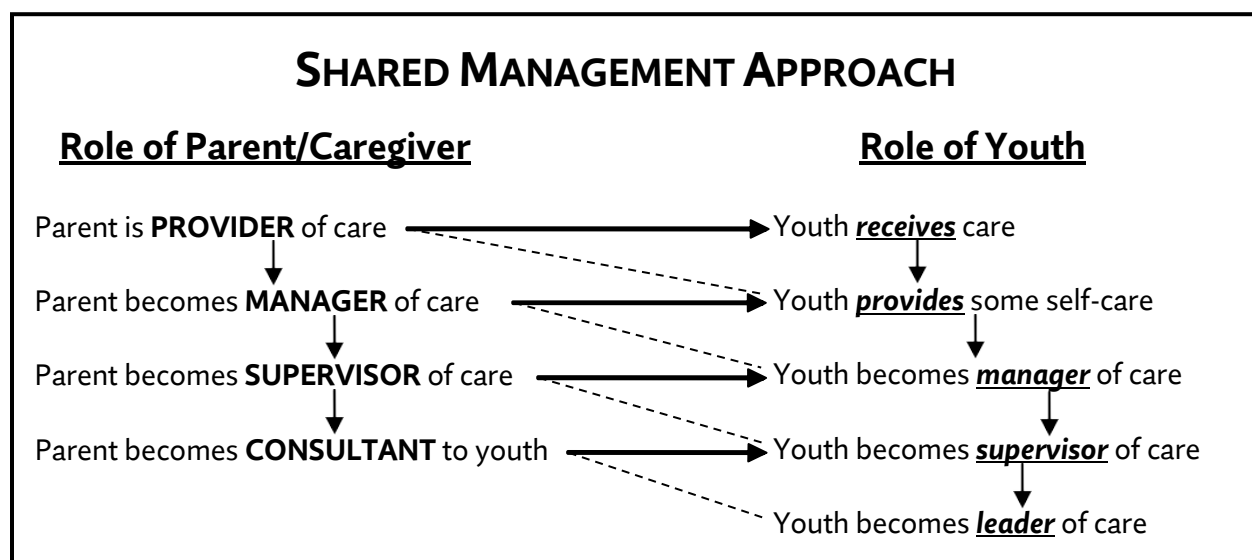

- Do you have any suggestions of adult doctors for my child to transfer to?
- What kinds of doctors in adult care does my child need (e.g., a primary care doctor, a specialist, a behavioral health provider)?
- Will you send my child's medical summary to the new adult doctor?
- If needed, will you communicate with the new adult doctor about my child's care?
- Before the initial visit is made to the new adult doctor, will you still refill their medicines and treat them for acute care needs?

NOTES: _____

*The American Academy of Pediatrics, American Academy of Family Physicians, and American College of Physicians recommend that all youth and young adults work with their doctor or other health care provider to build independence and prepare for the transition to adult care. For more information about transition, please visit gottransition.org/youth-and-young-adults and gottransition.org/parents-caregivers.

WHAT ARE THE CHANGING ROLES OF PARENTS/CAREGIVERS AND YOUTH IN THE TRANSITION PROCESS?

The goal of pediatric-to-adult health care transition (HCT) is to improve the ability of youth and young adults to manage their own health and effectively use health services, and the role of parents/caregivers is to support this gradual movement from overseeing care for the youth to becoming a consultant (answering questions when asked) to the young adult around their health and health care. This is called a shared management approach and is shown below, displaying these changing roles. Each youth and parent/caregiver will travel through this process at their own pace. While moving through this process, it will be necessary to talk to your youth’s doctor about necessary legal decision support documentation and other paperwork to support this approach.

Adapted from: University of WA Adolescent Health Transition Project. *Parent-Child Shared Management: Path to Independence*. Seattle, WA: 2010. Available at <https://depts.washington.edu/healthtr/documents/sharedmanage.pdf>.

Is your youth ready to become the **leader** of their care? Take Got Transition’s transition readiness assessment to find out! For a youth version, visit <https://gottransition.org/6ce/leaving-readiness-assessment-youth>. For a parent/caregiver version, visit <https://gottransition.org/6ce/leaving-readiness-assessment-parent>. For additional HCT information and resources, visit [GotTransition.org](https://gottransition.org).

Tool for Exploring Decision Making Supports

This tool was designed to assist individuals and supporters with exploring decision making support needs for each life domain.

Name of Individual: _____

Name of person completing this form: _____

Relationship to individual (*circle one*): Self Family Friend Guardian Other: _____

How long have you known the individual? _____

For each question below, mark the level of support you need when making and communicating decisions and choices in the Charting the LifeCourse life domains.

I can decide with no extra support

I need support with my decision

I need someone to decide for me

DAILY LIFE & EMPLOYMENT

Can I decide if or where I want to work?			
Can I look for and find a job (<i>read ads, apply, use personal contacts</i>)?			
Do I plan what my day will look like?			
Do I decide if I want to learn something new and how to best go about that?			
Can I make big decisions about money? (<i>open bank account, make big purchases</i>)			
Do I make everyday purchases? (<i>food, personal items, recreation</i>)			
Do I pay my bills on time (<i>rent, cell, electric, internet</i>)			
Do I keep a budget so I know how much money I have to spend?			
Am I able to manage the eligibility benefits I receive?			
Do I make sure no one is taking my money or using it for themselves?			

HEALTHY LIVING

Do I choose when to go to the doctor or dentist?			
Do I decide/direct what doctors, medical/health clinics, hospitals, specialists or other health care providers I use?			
Can I make health/medical choices for my day-to-day well-being? (<i>check-ups, routine screening, working out, vitamins</i>)			
Can I make medical choices in serious situations? (<i>surgery, big injury</i>)			
Can I make medical choices in an emergency?			
Can I take medications as directed or follow a prescribed diet?			
Do I know the reasons why I take my medication?			
Do I understand the consequences if I refuse medical treatment?			
Can I alert others and seek medical help for serious health problems?			
Do I make choices about birth control or pregnancy?			
Do I make choices about drugs or alcohol?			
Do I understand health consequences associated with choosing high risk behaviors (<i>substance abuse, overeating, high-risk sexual activities, etc.</i>)?			
Do I decide where, when, and what to eat?			
Do I understand the need for personal hygiene and dental care?			

CHARTING the LifeCourse

For each question below, mark the level of support you need when making and communicating decisions and choices in the Charting the LifeCourse life domains.

I can decide with no extra support

I need support with my decision

I need someone to decide for me

SOCIAL & SPIRITUALITY

Do I choose where and when (and if) I want to practice my faith?			
Do I make choices about what to do and who to spend time with?			
Do I decide if I want to date, and choose who I want to date?			
Can I make decisions about marriage (<i>If I want to marry, and who</i>)?			
Can I make choices about sex, and do I understand consent and permission in regard to sexual relationships?			

SAFETY & SECURITY

Do I make choices that help me avoid common environmental dangers (<i>traffic, sharp objects, hot stove, poisonous products, etc.</i>)?			
Do I make plans in case of emergencies?			
Do I know and understand my rights?			
Do I recognize and get help if I am being treated badly (<i>physically, emotionally or sexually abused, or neglected</i>)?			
Do I know who to contact if I feel like I'm in danger, being exploited, or being treated unfairly (<i>police, attorney, trusted friend</i>)?			

COMMUNITY LIVING

Do I decide where I live and who I live with?			
Do I make safe choices around my home (<i>turning off stove, having fire alarms, locking doors</i>)?			
Do I decide about how I keep my home or room clean and livable?			
Do I make choices about going places I travel to often (<i>work, bank, stores, church, friends' home</i>)?			
Do I make choices about going places I don't travel to often (<i>doctor appointments, special events</i>)?			
Do I decide how to get to the places I want or need to go? (<i>walk, ask a friend for a ride, bus, cab, car service</i>)?			
Do I decide and direct what kinds of support I need or want and choose who provides those supports?			

CITIZENSHIP & ADVOCACY

Do I decide who I want to represent my interests and support me?			
Do I choose whether to vote and who I vote for?			
Do I understand consequences of making decisions that will result in me committing a crime?			
Do I tell people what I want and don't want (verbally, by sign, device), and tell people how I make choices?			
Do I agree to and sign contracts and other formal agreements, such as powers of attorney?			
Do I decide who I want information shared with (family, friends etc.)?			

Turning 18: What it Means for Your Health

Turning 18 may not make you feel any different, but legally, this means you are an adult.

What does this mean?

- After you turn 18, your doctor talks to **you**, not your parents, about your health.
- Your health information and medical records are private (or confidential) and can't be shared unless you give the OK.
- It is up to you to make decisions for your own health care, although you can always ask others for help.

Things to know

- The confidentiality between you and your doctor is legally known as the Health Insurance Portability and Accessibility Act, or HIPAA.
- This law gives privacy rights to minors (people who are under age 18) for reproductive and sexual health, mental health, and substance abuse services. Check your state's minor consent laws for more information.

What needs to be done?

- If you want to share medical information with others, your doctor will ask you to fill out a form that allows them to see your medical record and be with you during your visit.
- If you need help making decisions, talk to your family, your support team, and your doctor about who needs to be involved and what you need to do to make sure they can be a part of the conversations.

Additional resources

- If you want extra support managing your health or making decisions, the [National Resource Center for Supported Decision-Making](#) has information to connect you with resources in your state.

PLANNING TO MOVE FROM PEDIATRIC TO ADULT CARE? HERE'S HOW THEY CAN DIFFER

Health care for youth is different than health care for adults. In adult care, you are in charge of your own care and involve your parents/caregivers if you choose. These are some of the changes that happen when you move to adult care.

Please circle any items in the Adult Approach to Care column that you have questions about. Bring this to your next doctor visit to start a conversation about any questions you may have.

Pediatric Care (Where you are now)	Adult Approach to Care (Where you will be)
Your parent/caregiver is with you for most or all of your visit.	 You see the doctor alone unless you agree for others to be present.
Your parent/caregiver helps answer questions and explain your medical conditions, any medicines, and medical history.	 You answer questions and explain your medical conditions, medicines, and medical history.
Your parent/caregiver is involved in making choices about your care.	 You make your own choices about your care, asking your parents/caregivers as needed.
Your parent/caregiver helps make appointments and get your medicines.	 You make your own appointments and get your medicines.
Your parent/caregiver helps with your care and reminds you to take your medicines.	 You take control of your care and take medicines on your own.
Your parent/caregiver can see your health information, including test results.	 Health information is private unless you agree to let others see it.
Your parent/caregiver knows your health insurance and pays any charges at the visit.	 You keep your health insurance card with you and pay any charges at the visit.
Your parent/caregiver keeps a record of your medical history and vaccines.	 You keep a record of your medical history and vaccines.
Many pediatric specialists provide both specialty and some primary care.	 Adult specialists often do not provide primary care, so you need to have a primary care doctor along with a specialist.

“The fact that I will have to go ... and not being familiar with it. That’s probably where the nervousness comes in.”

“I guess that’s one of the reasons I’m not jumping to change doctors is because I feel close to him and I trust him.”

From **youth** in **pediatric care**¹

From **young adults** in **adult care**¹

“They treat you more maturely. They expect you to know your responsibilities and stuff ... I like it. I like to have responsibility. I mean it’s knowing ... you have to know your medications and everything.”

“She gave me this big talk about some of the new things I’m going to encounter as an adult with a chronic condition. And she just opened my eyes to a lot of things.”

TIPS FOR PREPARING FOR YOUR MOVE TO ADULT HEALTH CARE

- Write down a list of questions and concerns you have before seeing your new doctor.
- Keep a list of your medicines, how much you take, and any allergies to medicines. You can take a picture of your medicines label and bring it with you to your visit.
- Keep your doctor’s phone number in your phone or somewhere you can easily find it.
- Keep your health insurance card with you always.
- Keep a record of your medical history, allergies and vaccines to share with your new doctor.
- Ask your doctor where to go if you need to get care after office hours or on the weekend.
- Ask your doctor to explain information you do not understand
- Ask your doctor if there is an online portal or an app you can use to look up your health information, contact information, or to make appointments.

TEST HOW READY YOU ARE TO MOVE TO ADULT CARE BY TAKING THIS QUIZ:

SYSTEM DIFFERENCES BETWEEN PEDIATRIC AND ADULT HEALTH CARE

System Characteristics	Pediatric	Adult
Orientation to Care	Growth and development	Maintenance of well-being with aging
Practice Approach	Family-centered; shared decision-making with parents	Patient-centered; shared decision-making with young adult
Primary Care Practice Patient Population	Majority of patients do not have chronic conditions	Majority of patients have chronic conditions
Specialty Clinic Affiliation/Location	Most pediatric specialty clinics located in children's hospitals	Most adult specialty practices located in private office-based settings
Multidisciplinary Staffing	Most pediatric specialty clinics are co-located with other specialists and can offer ancillary therapies	Most adult specialty clinics are not co-located with other specialists and need to refer out to other specialists and ancillary therapists
Availability of Care Coordination	Most pediatric subspecialty clinics and many pediatric primary care practices have care coordination services. Several public care coordination programs (e.g., State Title V program) are available for youth with specific chronic conditions	Few adult specialty clinics and even fewer adult primary care practices have the availability of care coordination services. Few public care coordination programs are available for adults with chronic conditions
Length of Appointment	Longer time	Shorter time
Time Alone	Sometimes for part of visit	Legally required for confidentiality over age 18, unless young adult gives permission for others to be present
Patient Role as Self Advocate	Less, given parental support/presence during visit	Essential
Patient Role in Making Appointments and Medication Refills	Parent handles	Patient handles
Adherence to Care	Offer more reminders and work arounds (e.g., using shots or intravenous medications); provider has legal option of contacting protective services if needed	Expectation of adherence; up to patient to follow treatment/medication recommendations; provider has no legal options
Medication Dosage	Depends on weight	Commonly one adult dose, but occasionally related to weight
Use of Pain Medications	More liberal availability	More restrictive availability
Time in Care System	Usually about 20-25 years	Average 50+ years

I know when I need to take my medicines without someone telling me.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
I know how to refill my medicines if and when I need to.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

WHICH OF THE SKILLS LISTED ABOVE DO YOU MOST WANT TO WORK ON?

How to Score the Transition Readiness Assessment for Youth *(For Office Use Only)*

The purpose of the transition readiness assessment is to begin a discussion with youth about health-related skills. Scoring is optional and can be used to follow individual progress on gaining these skills, not to predict successful transition outcomes.

This scoring sheet can be filled out to score a youth’s completed transition readiness assessment or it can be used as a scoring guide to refer to when marking the score on their completed assessment.

Each response can be converted to a score of 0 (No), 1 (I want to learn), or 2 (Yes). Because not all youth are taking medicines, numbers in “My Health & Health Care” and “My Medicines” should be calculated separately.

MY HEALTH & HEALTH CARE <i>Please check the answer that best applies now.</i>	NO	I WANT TO LEARN	YES
